Firm Philosophy & Objectives

The name, Professional Associates, Ltd. is based on the concept of qualified and dedicated professionals associating themselves together to provide architectural and planning excellence. This excellence is the firm's foundation.

Professional Associates, Ltd. feels that an architectural design is only good if our clients appreciate, understand, and use the design. We utilize the LEAN Process which allows us to work together with our clients, because there is an obligation for us to understand their specific needs and goals. This process then lets us respond to our client's particular needs with innovation, which allows us to create unique solutions together, that is functionally, financially, and aesthetically appropriate.
