Firm Philosophy & Objectives

Alley Poyner Macchietto Architecture is a twenty-eight year old Omaha based design firm with a diverse portfolio of experience on a variety of public and private projects. Our renovation and new construction work includes a wide range of project types, including higher education, medical and clinical facilities, housing, and hospitality. Our celebrated open studio culture and eclectic mix of our staff's experience enhances our collaborative approach to each unique project we work on. We believe the best solutions are born out of a process of collaboration and enjoy working with our clients to make their vision a reality.

Well-known for our extensive historic renovation experience, we believe in the economic, educational, social and cultural significance inherent with preserving historic structures. We have been responsible for helping over 35 buildings and districts land on the National Register of Historic Places. This experience paired with our long standing relationship with the National Arbor Day Foundation and our keen interest in sustainable design has earned us recognition as a leader in the field of "Green Architecture".
